IMPACT
Incident Management, Prioritization, Alerting and Coordination Tool

Transforming Disaster Management with Real-Time Alerts and Intelligence.

IMPACT is a **Comprehensive Decision Support Tool** that provides real-time alerts and intelligence on emerging threats and their impacts on vulnerable communities and critical infrastructure. **Granular Insights** offer detailed analysis from local to regional scales to aid in effective disaster response and resource allocation.

Continuous Monitoring
Assesses risks from natural and man-made hazards in real-time.

Automated Alerting
Delivers instant notifications about threats to ensure timely responses.

Analytics & Reporting
Generates detailed reports and visualizations to identify high-risk areas.

Benefits of IMPACT

Real-Time Assessments
Track the number and characteristics of affected populations and critical community functionalities.

Resource Allocation
Prioritizes areas most in need to ensure efficient aid distribution.

Universal Integration
Supports various applications from emergency management to urban planning and public health.

Why IMPACT?

Respond Fast
Quickly notify first responders and organizations about emerging threats.
Gain Insights
Prioritize disaster management with in-depth analysis of potential impacts on communities and assets.

Proven Results
Used nationally and locally for disaster impact estimation, response planning, and more.

Join the Future of Disaster Management
Equip your organization with the IMPACT tool and enhance your visibility, coordination, and response capabilities with consolidated and actionable intelligence.
